

HOW TO INSTALL SAFE EXAM BROWSER (SEB) for Windows

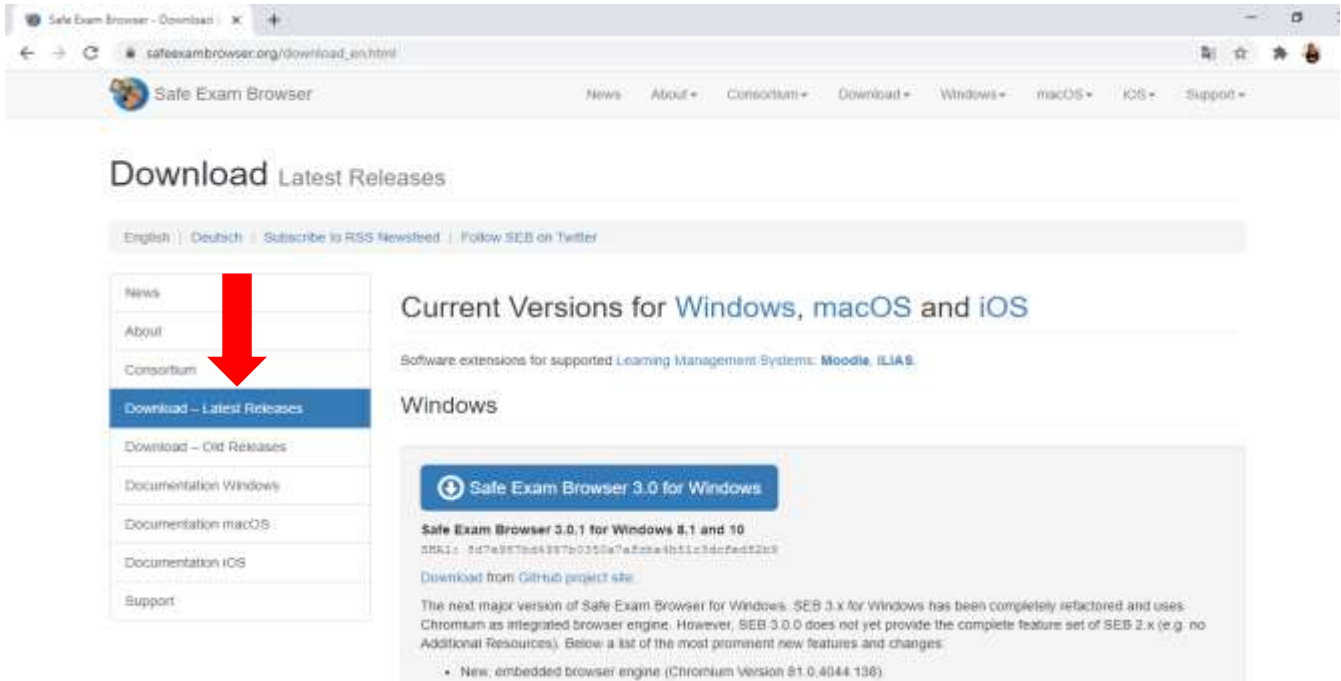

SEB is a browser that disables the option of opening a new tab/window, windows task bar and many other applications during an on-going exam by locking down the screen/computer. The students at NEU are required to download SEB and install it on their computer in order to be able to sit for any kind of exam (MT, Final, exemption,...etc) administered by the university. The computers/smart devices without Safe Exam Browser will not be given access for the exams. Please follow the instructions below to install SEB onto your computer:

1. Type in 'Safe Exam Browser' into the search bar and go to safexambrowser.org.

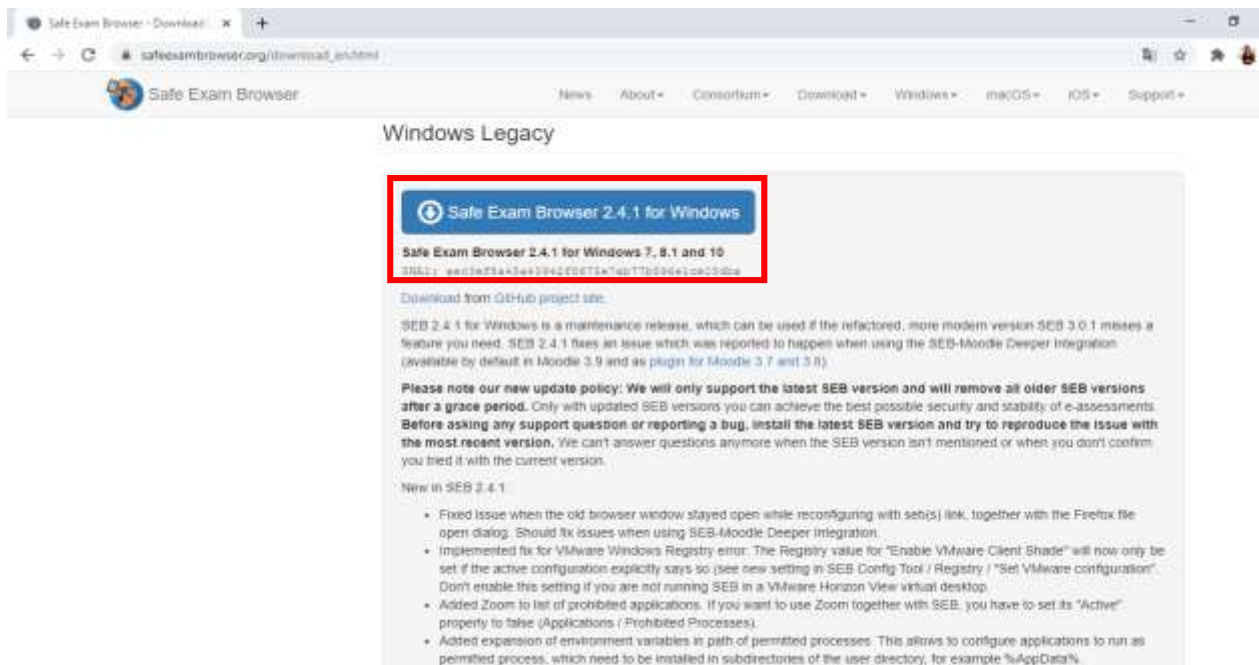

The screenshot shows a search engine results page for the query "safe exam browser". The search bar at the top contains the text "safe exam browser" and has icons for a close button, keyboard, microphone, and search. Below the search bar, there are navigation options: "Tümü", "Görseller", "Videolar", "Haberler", "Alışveriş", "Daha fazla", "Ayarlar", and "Araçlar". The search results indicate that approximately 44,000,000 results were found in 0.37 seconds. The first result is from safexambrowser.org, titled "Safe Exam Browser - News". The snippet for this result states: "Safe Exam Browser (SEB) is being used to secure exams running in various commercial and open source e-assessment solutions and learning management ...". Below the snippet, there are four links: "Download", "Overview", "Windows User Manual", and "macOS User Manual". Each link has a short description: "Download" (Please note our new update policy: We will only support the latest ...), "Overview" (Safe Exam Browser is a web browser environment to carry ...), "Windows User Manual" (The following manual explains how to configure and use SEB ...), and "macOS User Manual" (SEB also detects attempts to switch the user and displays a ...).

2. Click on **Download**. Download the 3.0 version for all Windows operating systems.

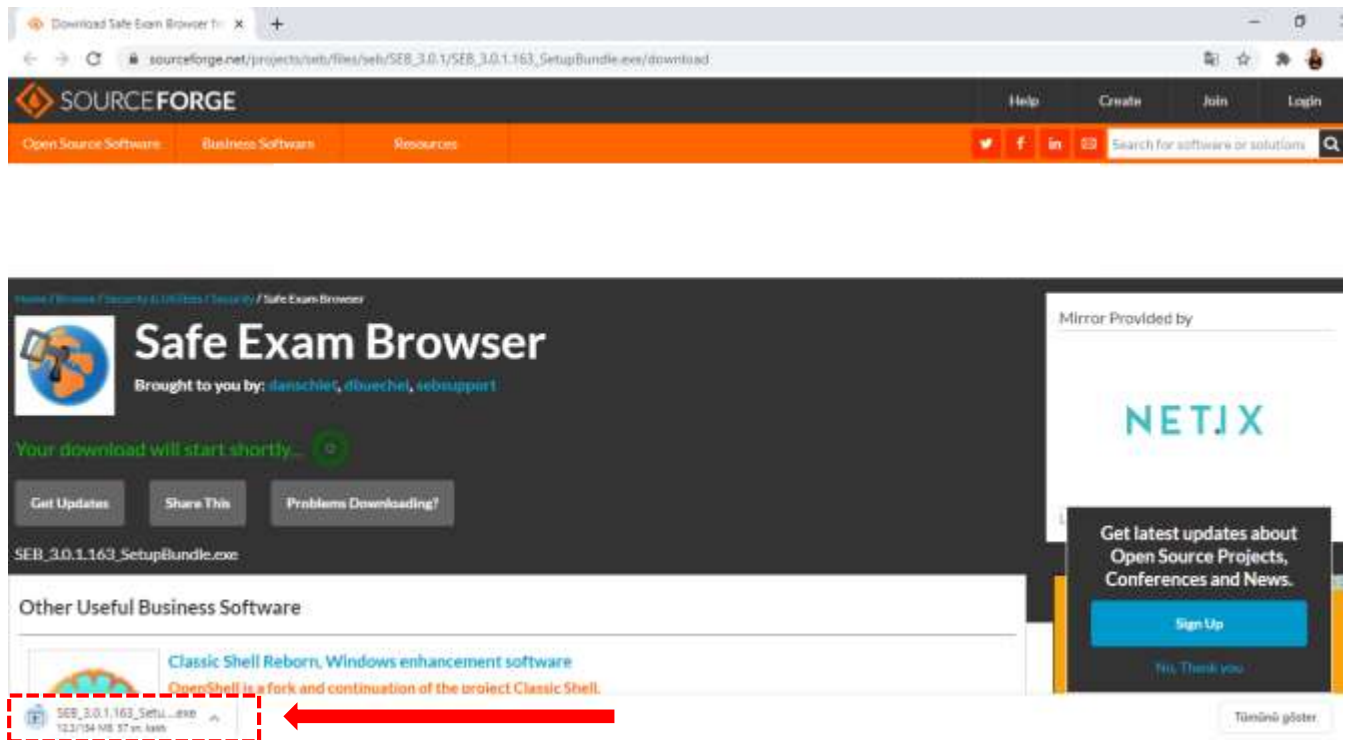

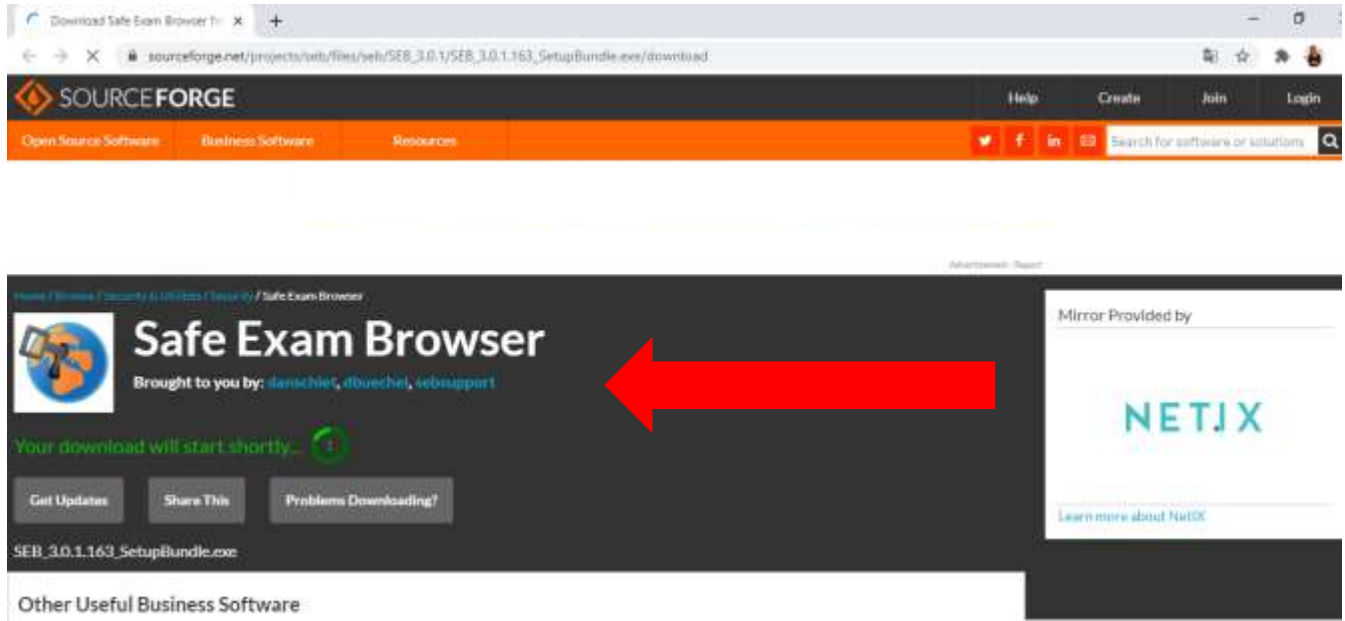

The screenshot shows the 'Download Latest Releases' page of the Safe Exam Browser website. A red arrow points to the 'Download - Latest Releases' menu item in the left sidebar. The main content area is titled 'Current Versions for Windows, macOS and iOS' and features a prominent blue button labeled 'Safe Exam Browser 3.0 for Windows'. Below this button, the text reads: 'Safe Exam Browser 3.0.1 for Windows 8.1 and 10', followed by a SHA1 hash and a link to 'Download from GitHub project site'. A paragraph explains that SEB 3.0.0 is a refactored version with Chromium as the browser engine, but it does not yet provide the complete feature set of SEB 2.x. A bulleted list highlights a new feature: 'New, embedded browser engine (Chromium Version 81.0.4044.138)'.

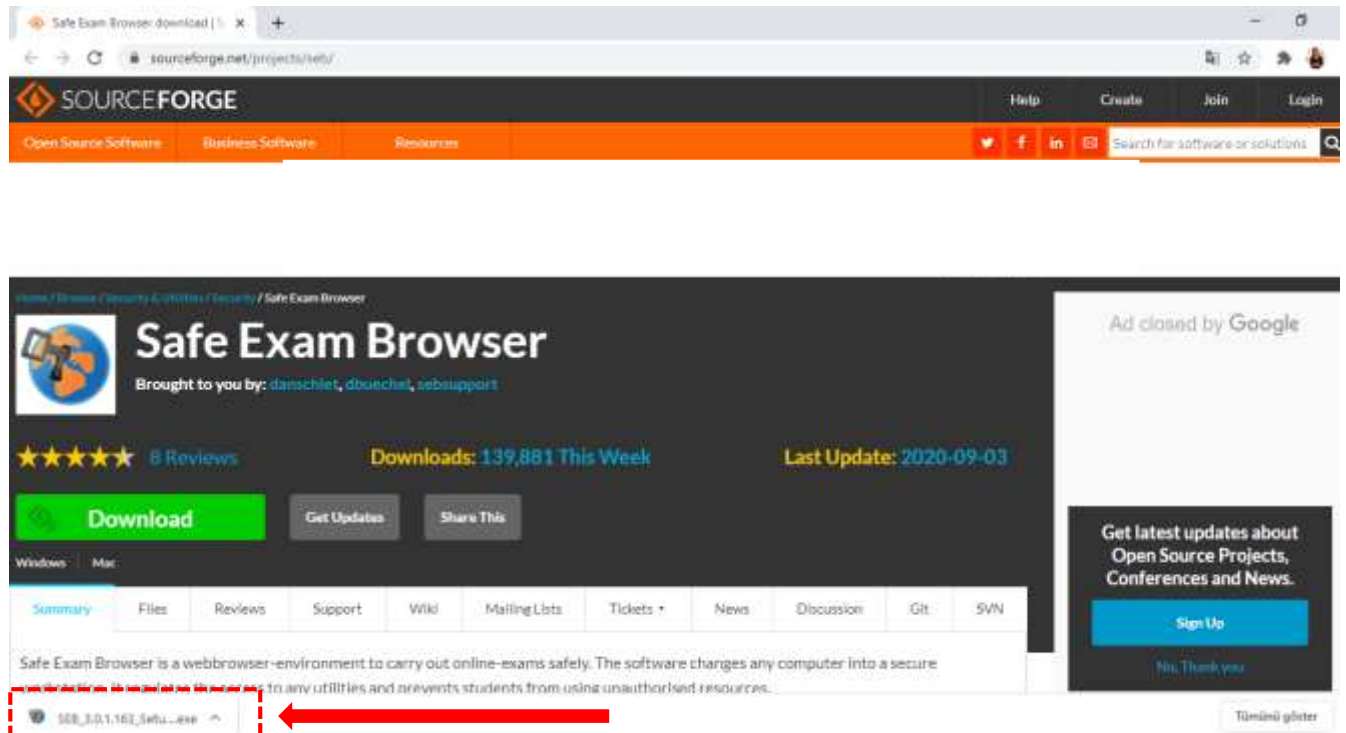

If Safe Exam Browser 3.0 does not work on your computer, uninstall it and download **Safe Exam Browser 2.4.1**.

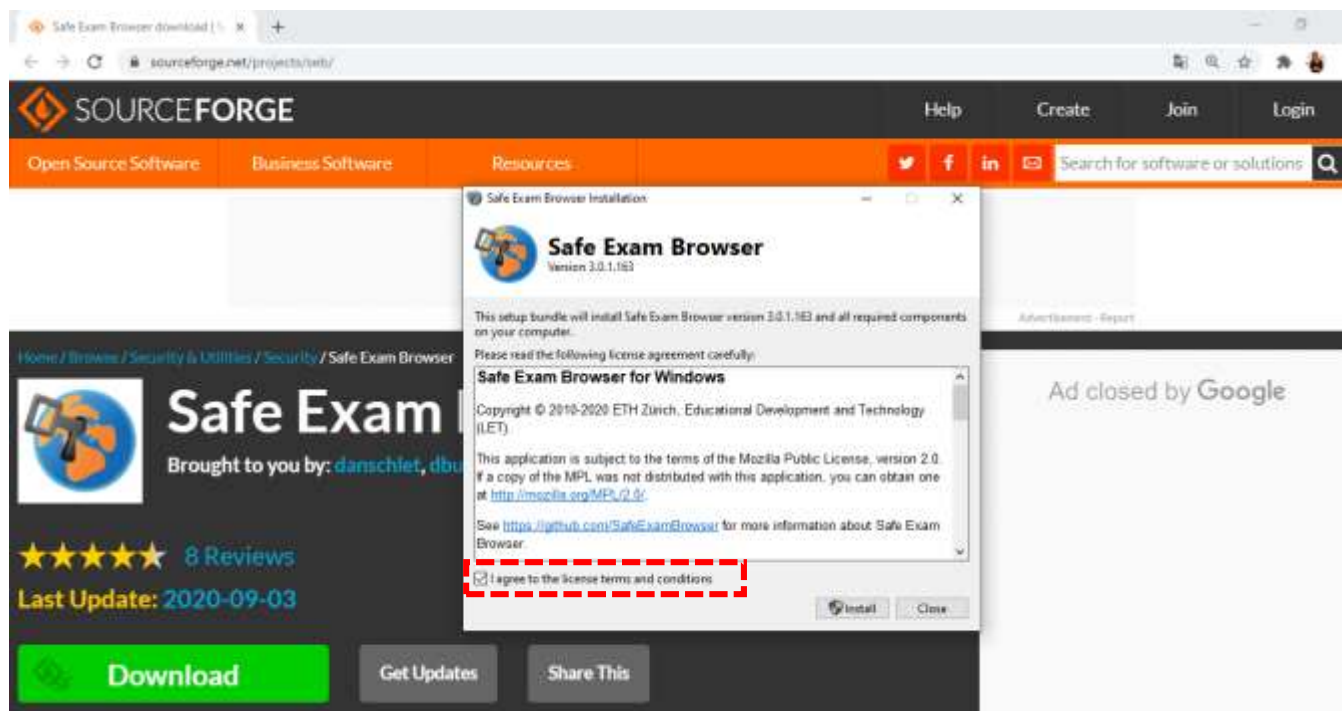

The screenshot shows the 'Windows Legacy' section of the Safe Exam Browser website. A red box highlights a blue button labeled 'Safe Exam Browser 2.4.1 for Windows'. Below the button, the text reads: 'Safe Exam Browser 2.4.1 for Windows 7, 8.1 and 10', followed by a SHA1 hash and a link to 'Download from GitHub project site'. A paragraph explains that SEB 2.4.1 is a maintenance release for users who need features from the refactored SEB 3.0.1. A bolded note states: 'Please note our new update policy: We will only support the latest SEB version and will remove all older SEB versions after a grace period. Only with updated SEB versions you can achieve the best possible security and stability of e-assessments. Before asking any support question or reporting a bug, install the latest SEB version and try to reproduce the issue with the most recent version. We can't answer questions anymore when the SEB version isn't mentioned or when you don't confirm you tried it with the current version.' A section titled 'New in SEB 2.4.1' lists several fixes and improvements, including a fixed issue with the old browser window, a VMware Registry error fix, and added Zoom and environment variable support.

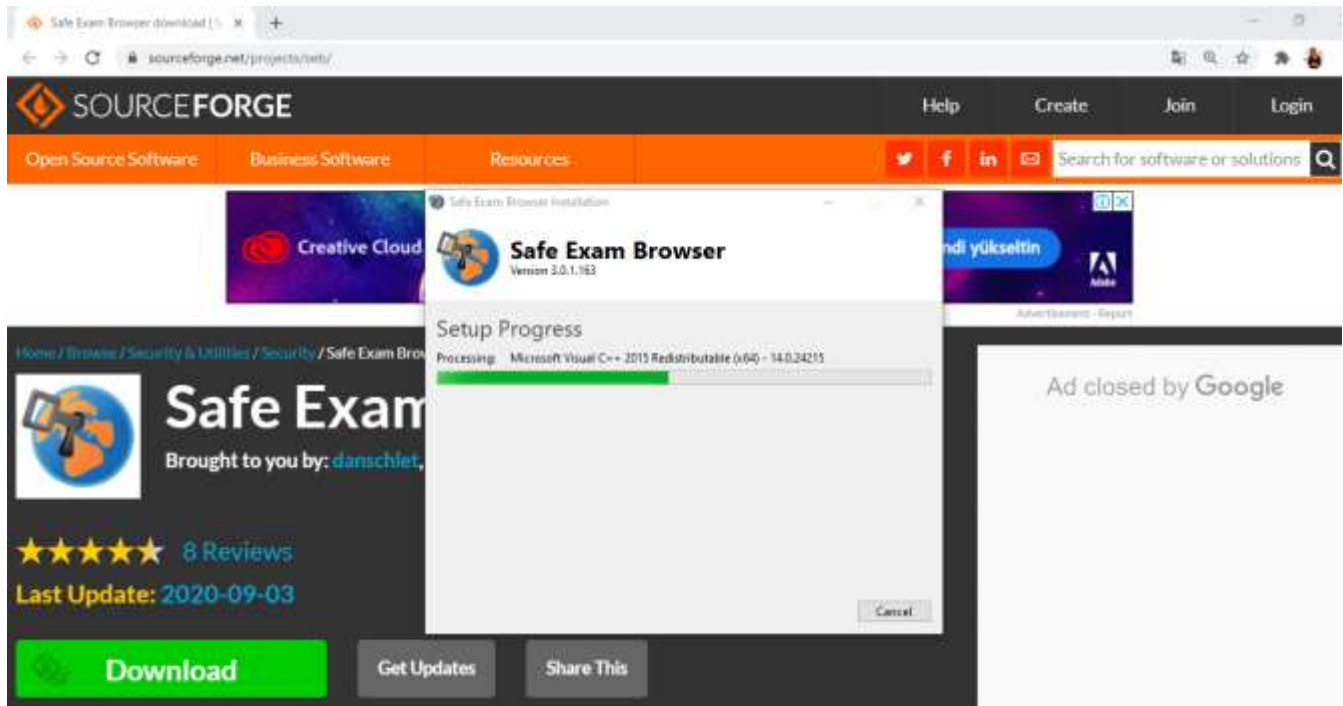

3. The page below will appear once you click on download. To start downloading, click on **'Save'**.

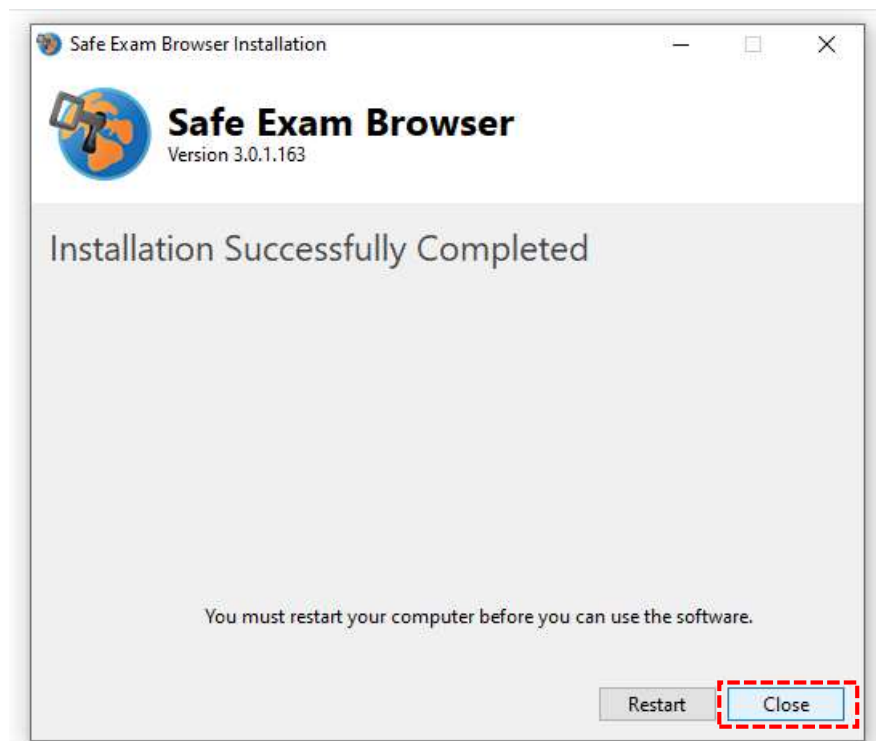

4. Wait until the downloading process is complete. Then click on the **'exe'** file that you will see at the left bottom corner once it is downloaded. In the window that pops up, tick **'I agree to the licence terms and conditions'** and click on **install**.

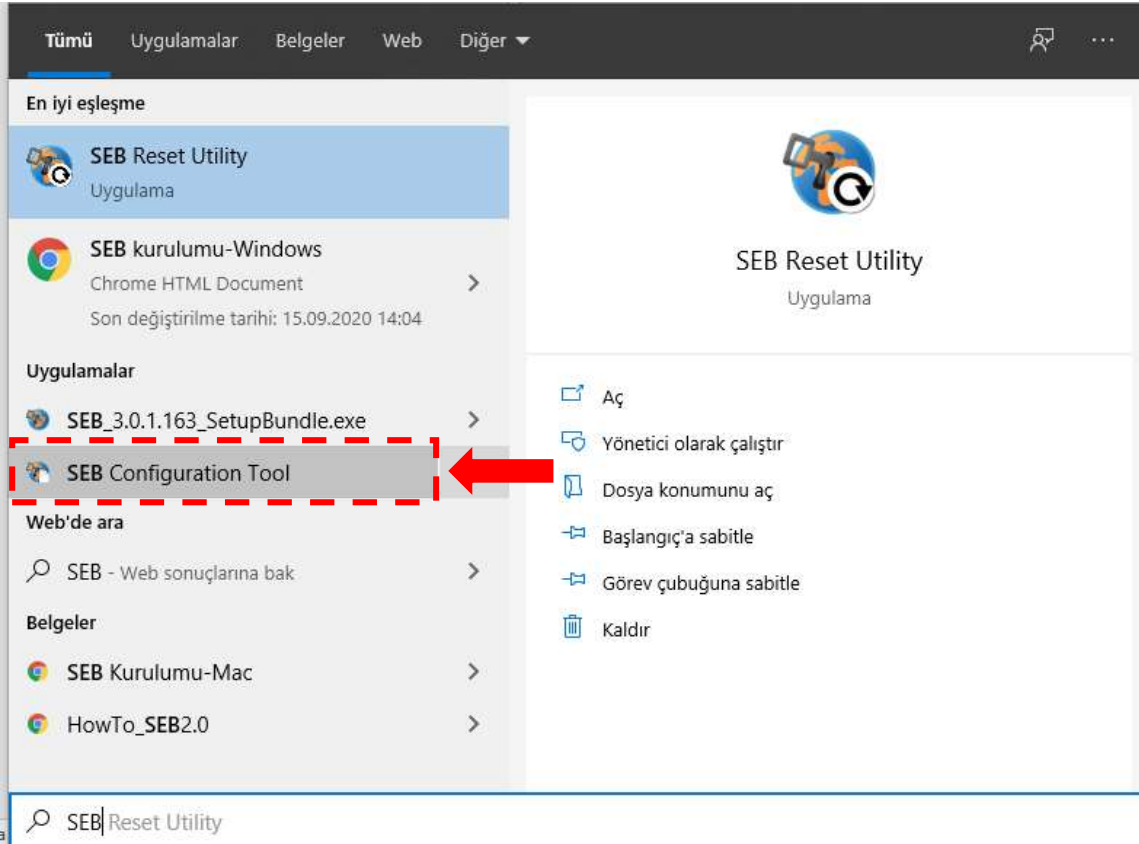

5. Click on **'yes'** in the window that pops up.

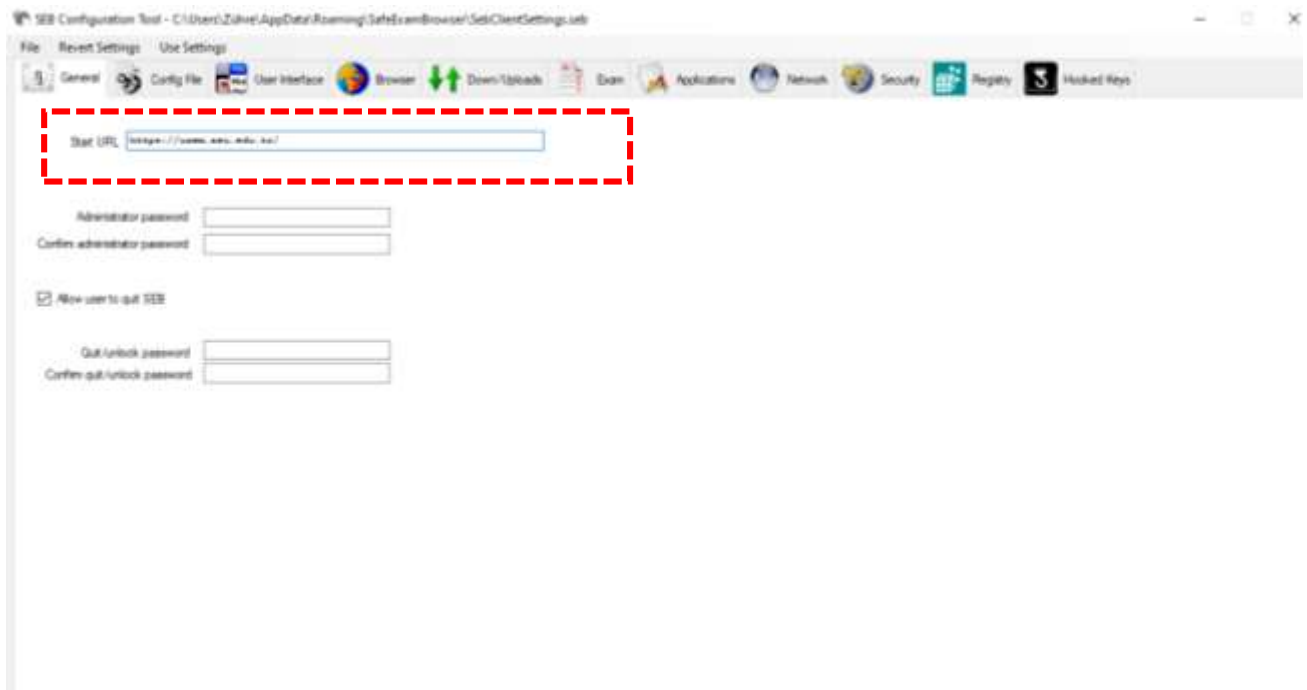

6. Once the installation is complete, click on 'close'.

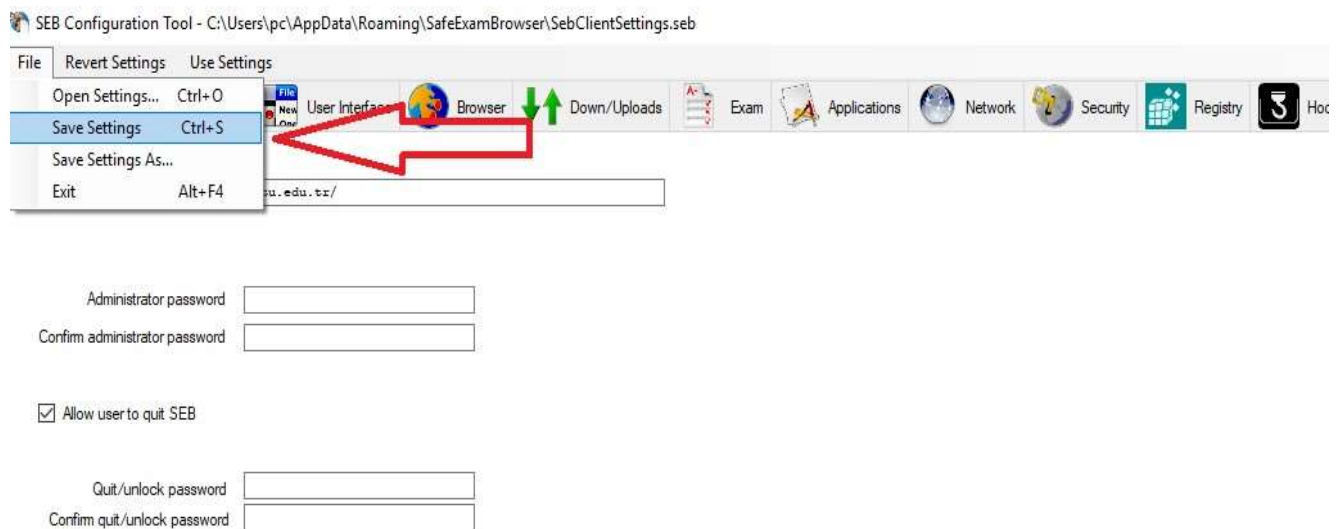

7. Go to the your computer's menu and open **SEB Configuration Tool**.

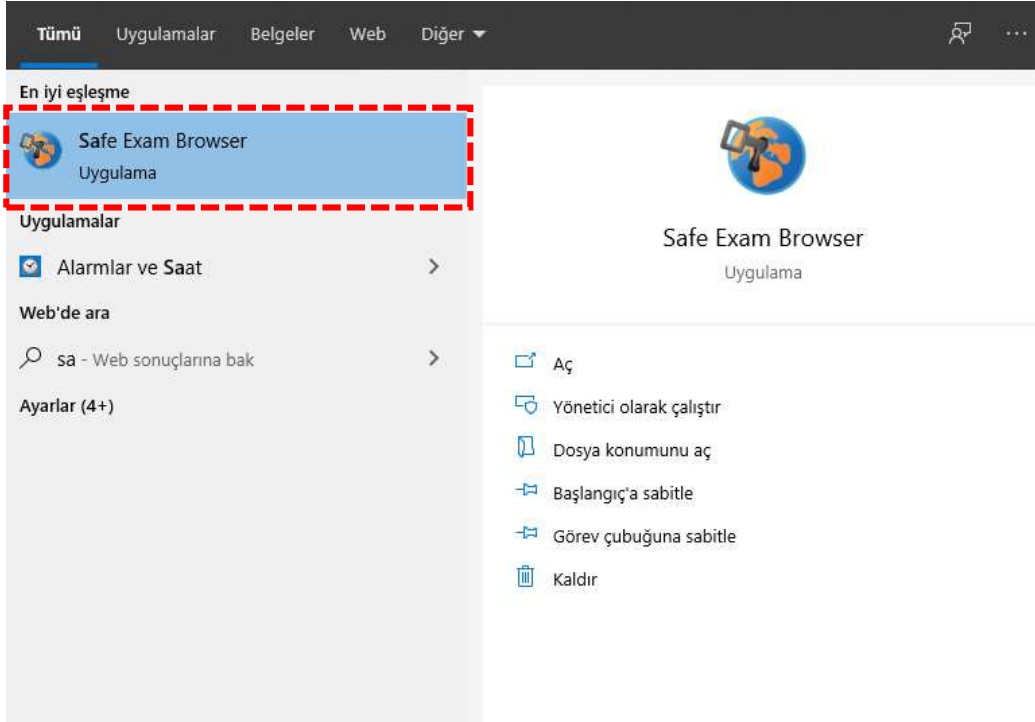

8. You need to change the address stated in the 'Start URL' section by writing <https://esinav.neu.edu.tr/>

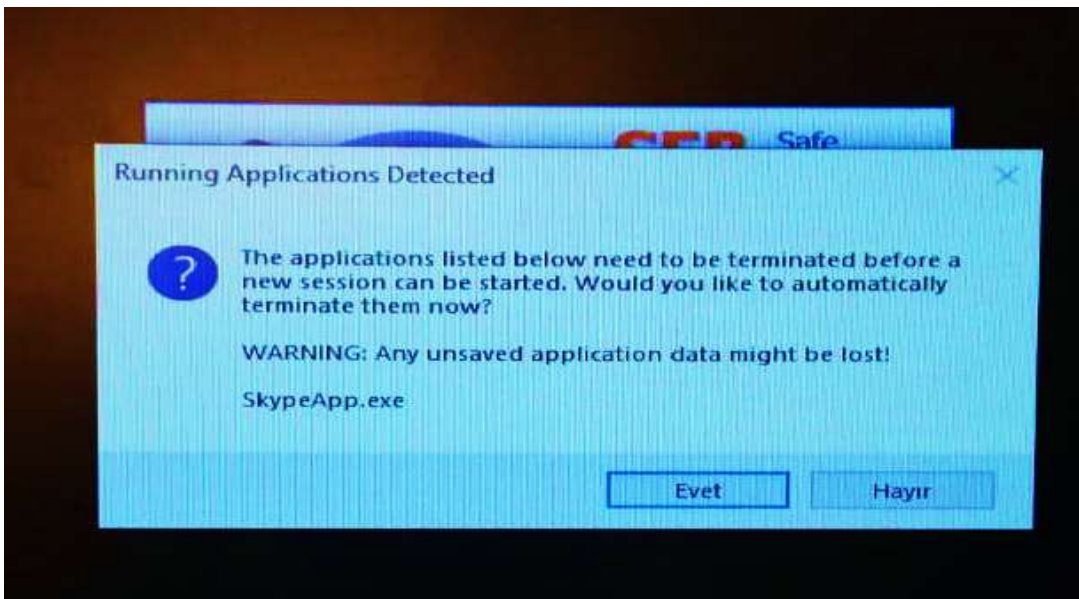

9. To save the changes, click on 'File' and then 'save settings'.

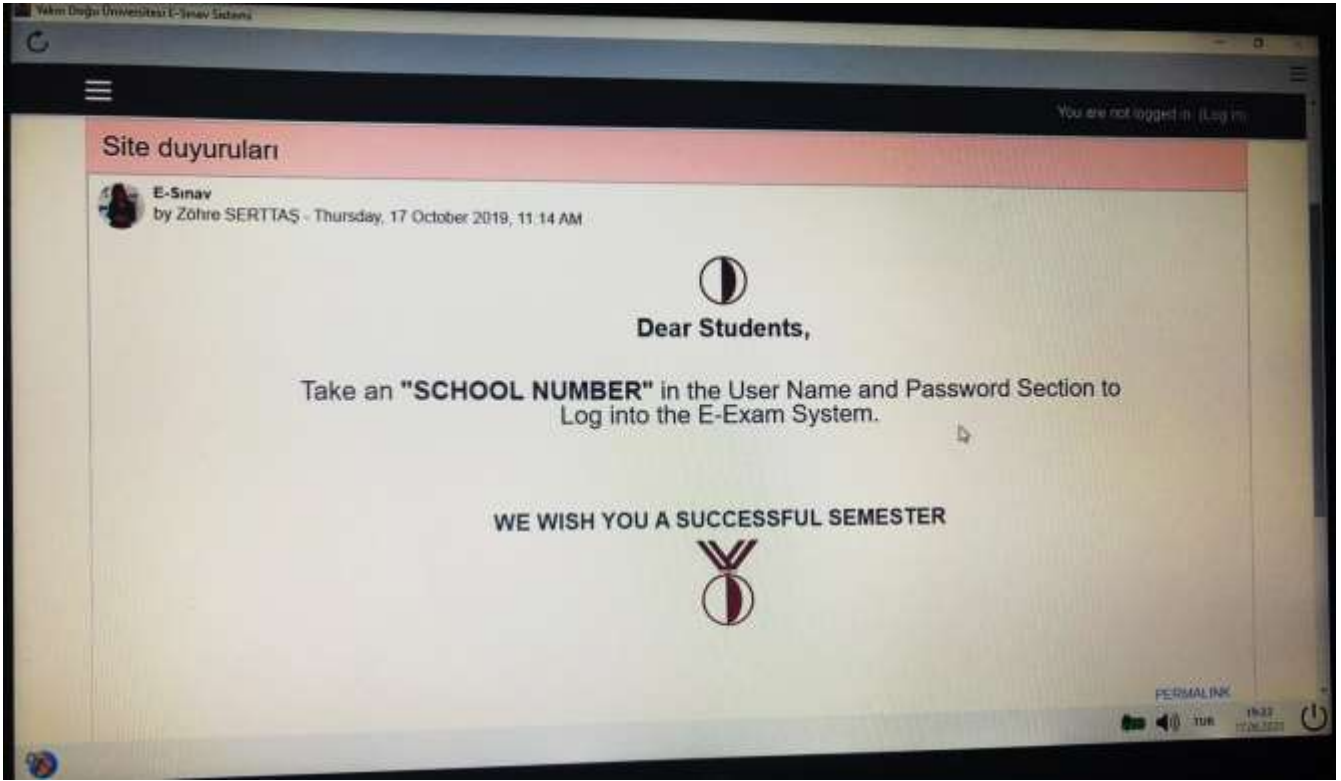

10. Once you complete all these, you can enter the exam by clicking on the **Safe Exam Browser icon on the desktop.**

11. If a warning like the one below pops up, that means that you have open applications. Click on 'yes' to continue. Otherwise, you can not access the e-exam platform.

12. **Log in** (at the top-right corner) to the NEU e-exam platform by entering your username and password.

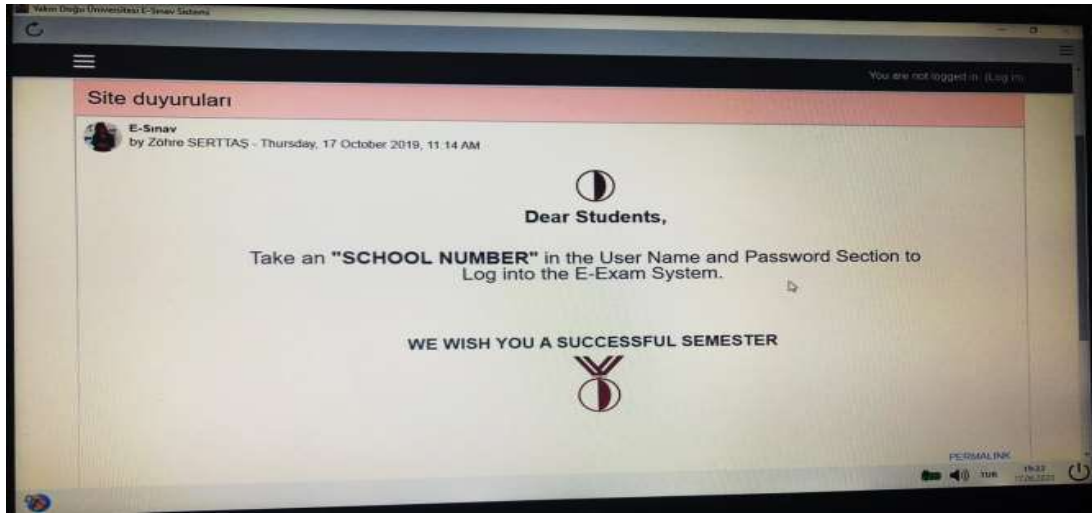

How will you access the exam?

1. Starting SEB from the START MENU. This will lead you directly to esinav.neu.edu.tr.
2. First you need to **log in**.
3. You then need to **choose the designated exam** from the list given on the home page of NEU e-exam platform.
4. Click on **'Enrol me'** or **'Beni kaydet'** will appear below the page. Click on it.
5. When you see the name of the exam you will take, click on it and you will see two options:

LAUNCH EXAM BROWSER

DOWNLOAD CONFIGURATION

You can choose either of them and you will be able to see the exam (**start the exam button**). If you can't or if nothing changes on the page, then you need to check whether the Safe Exam Browser has been downloaded properly or not.

Password

To attempt this quiz you need to know the quiz password

Quiz password

Time limit

Your attempt will have a time limit of 2 hours. When you start, the timer will begin to count down and cannot be paused. You must finish your attempt before it expires. Are you sure you wish to start now?
